## SUMMARY

Flutter developer with published apps on Google Play and App Store. Skilled in Flutter, Dart, Firebase, RESTful APIs, and state management with GetX. Built clean, user-friendly mobile apps with real-time data, offline support, and secure authentication. Passionate about writing clean code and delivering smooth cross-platform experiences.

## WORK EXPERIENCE

Flutter Developer

April 2025 - Present

Softvence Agency | Mohakhali, Dhaka

- Contributed to 8+ cross-platform mobile application projects using Flutter & Dart, with 1 app successfully published on both Google Play and Apple App Store and others in active development.
- Collaborated with designers to implement intuitive UI/UX features.
- Integrated RESTful APIs for seamless data communication.
- Engaged in team meetings to discuss project progress and updates.
- Maintained clean, scalable code with Git version control, ensuring smooth collaboration within the development team.
- Conducted debugging and troubleshooting of application issues.

## SKILLS

- **Flutter & Dart** — Cross-platform app development
- **State Management** — GetX
- **API Integration** — RESTful APIs, custom auth (JWT)
- **Firebase Suite** — Auth, Firestore, Cloud Messaging (FCM), Crashlytics
- **Authentication** — Google Sign-In, secure login flows
- **Storage** — Shared Preferences, Hive, Secure Storage
- **Google Maps SDK & Places API** — Location search, geocoding, and custom UI components
- **Notifications** — FCM push & local notifications
- **Payments** — Stripe integration
- **Localization** — Multi-language support
- **Deployment** — Signed APKs/IPAs, Play Store & App Store release
- **Version Control** — Git, GitHub, branching & merge strategies

## PUBLISHED APP

**Real Convert – The Ultimate Currency Companion** (*Client Project*)

Google Play & Apple App Store

- Cross-platform currency converter built with Flutter & Dart, delivering real-time rates for 160+ currencies.
- Integrated RESTful APIs for live exchange rates and interactive 5-year historical charts.
- Developed offline mode with cached data for uninterrupted access.
- Implemented customizable favorites and home screen widgets for quick conversions.
- Designed a clean, intuitive UI with responsive layouts for Android and iOS.

PROJECTS

Crafty Bay e-commerce app | [Link](#)

- A Flutter-based e-commerce app utilizing GetX for state management, featuring user authentication, profile management, and API integration for a smooth shopping experience.

Task Manager | [Link](#)

- A Flutter-based app utilizing GetX for state management, enabling users to efficiently add, update, delete, and manage tasks, with features for user authentication and profile management.

Text to image(Firebase AI Logic) | [Link](#)

- Created an app with Flutter that turns text into images using Firebase AI. It has a clean, modern design and lets users save and share images easily.

Mosque Finder App | [Link](#)

- A Flutter app that helps users find nearby mosques using Google Maps and Places API, with a map view, list, and detailed mosque info.

DIU Result | [Link](#)

- This is a Flutter app for Daffodil International University students, featuring two main options: a result finder and a CGPA calculator. The result section shows student information, total CGPA, and semester-wise results. The app is currently 70% complete.

Sentiment Analysis App | [Link](#)

- A Flutter app that uses an API to analyze text sentiment (positive, neutral, or negative).

Daily tools (Native)| [Link](#)

- An Android application developed in Java, offering a calculator, unit converter, personal notes, and an about section. It incorporates user authentication and account management via Firebase Authentication and Firestore.

OPEN SOURCE CONTRIBUTION

Step Indicator Package – *pub.dev*

- Published Flutter package for step progress indicators.
- Provides customizable UI components for step-based workflows.
- Features: horizontal & vertical layouts, animations, theming options.
- 250+ downloads .
